# 1. INTRODUCTION

A study tour is an experience where students study abroad as an alternative to the traditional classroom-based learning. Students are required to meet course objectives and graded on specific learning outcomes based on the class syllabus. A study tour is a unique travel experience that combines learning with travelling. The study tour or excursion are the natural medium of instruction suitable for developmental education. It provides direct experience leading to effective understanding.

The place that we selected for our tour was Kalamandalam and Nila River. The one day tour was on 25<sup>th</sup> February 2022. It provides a wide range of possibilities to know about Kalamandalam and enjoy the beauty of river and nature.

# 2. LEARNING OUTCOME

After the tour programme the learners will be able to:

- Create understanding about the nature and its surroundings
- Develop social and historical knowledge
- Help in the development of personality
- Develop critical thinking

- Develop effective communication
- Help students for mind relaxation.
- Develop respect for culture
- Develop the better understanding of issues related to socio-economic factors.
- Develop global networking
- Develop planning and Execution power.

### 3. IDENTIFICATION OF THE SPOT

Educational trips are important in the life of learners during the learning process in many ways. Due to the presence of Covid-19 Pandemic we were asked to conduct a one-day trip. As a part of this we had a discussion among the students and with the town co-ordinator Mr. Thomson Sin and identify the spot. The spot we had a discussion led by principal Rev. Dr. Chacko Chiramel on the selection of town spot. Although many students suggested different places in the suggestion, but for various reasons we decided to go to Kallarmandalam and Alwartha Puzha. Kallarmandalam is situated in the vicinity of Thiruvananthapuram district which is 2½ hours travel from Muvattupuzha. It is marked as the largest River in Kerala.

# INTRODUCTION

To understand the concept of education clearly. Education is both the act of teaching knowledge to others and the act of receiving knowledge from someone else. Education also refers to the knowledge received through schooling or instruction and to the institution of teaching as a whole. Education institutions are a source of formal education for society. They are sources to disseminate education and its importance. Institutions teach the importance of educational psychology to society. At institutions the students are also made aware of the importance of sociology of education to the society.

## AIM AND OBJECTIVES

To understand the historical importance of the institution. The institutional impact that make development of a particular area and to study how it may impact on the people and students who were studied in the institution.

### OBJECTIVES

- \* Understand the history of an institution
- \* Understand the institutional implication for a particular area.
- \* Understand the developmental changes in that area by this institution.
- \* Understand the evolutionary changes on structural and constructional areas.
- \* To understand various changes from the previous to present condition.

## TASK - 2

## INTRODUCTION

The field study is an educational technique, which makes the educational process more active, helps the students to work in real situations and to develop skills competencies and positive attitudes through activation of their existing ones. Students who directly participate during a field experience generates more positive attitude about the subject effective methods to develop students interest include experimental activities and field trips which creates a authentic learning opportunities for students.

The purpose of this report is to discuss and explain my experiences during my field study. Our field study was carried out in "Kalamandalam" cheruthuruthi and vallathol museum.

## Learning Outcome

After the field study learners will be able to

- \* develop the skill of enquiry, investigation analysis, evaluation and presentation.
- \* know about the significant events in British history and to appreciate new things have changed overtime.
- \* develop a sense of chronology
- \* increase student-student and student-teacher interaction.
- \* transfer potential, positive attitudes towards science
- \* develop soft skills such as leadership, teamwork and communication skills.
- \* critical thinking, long-term retention.
